## Feature Requests

Posted by price1 - 2008/08/06 04:53

---

1) Enable the quiz-taker to enter some personal information at the beginning of the quiz, which is included in the email sent to the website owner or receipient at the completion of the quiz.

2) The ability to copy questions in bulk from the Question Bank to a specific quiz, and vice versa. In other words, if some questions are specific to a quiz and it's then decided to use them elsewhere, the ability to copy questions in bulk from a specific quiz to the Question Bank would be very helpful.

---

1) We have received the letter with detailed requirements description and replied to it.

2) We are going to add functionality to copy quizzes and questions in a month or so. If you need this earlier, this will be custom development - please contact us about this via email.

Regards,  
ARI Soft

We can wait for the copy feature. It is non-urgent for us, but a strong "would be good to have".
