
Quiz list is missing

Posted by dwayinc - 2008/08/09 19:36

I have purchased Ari Quiz and installed using the Joomla install utility. Reading the help page that comes with the script I can not find the Quiz list referred in the help page.

It is still unclear to me why developers can not by snag it by www.techsmith.com and just do nice tutorials with images to avoid long back and forth support issues.

The bottom line is I have purchased a quiz script that is not working despite the fact I have followed the installation instructions.

Help is appreciated.

Hello,

By default ARI Quiz component tries to add menu item to the main menu. So you can just create appropriate menu item and assign it to the component.

If you are unable to see the quiz list on the backend (Components->ARI Quiz-> Quizzes) please provide us with access to your Joomla! system so we could log in and investigate. Please send us credentials via email.

Regards,
ARI Soft
