
Hotspot

Posted by dwayinc - 2008/08/14 19:59

I am not sure how to add the hotspot in the picture in the hotspot picture question type.

Help is appreciated.

Once again, Camtasia and Snag It is a great way to create tutorials.

Hello,

While creating hot spot question select/upload the image. After selecting the image you will see it is wrapped in blue rectangle. Simply drag and resize this rectangle by the corners using your mouse to indicate the area for hot spot. Please see our demo in administration part: <http://demo2.ari-soft.com>

Regards,
ARI Soft
