How to limit each user to take quiz once?

Posted by sgudek2 - 2008/09/07 23:20

_____

Hello,

I have two questions:

1) When the access level is changed from GUEST to REGISTERED, when the guest user tries to take the quiz, NO CONTINUE button appear, as expected, but the user is NOT prompted to register, like:

"Sorry, you need to register and login in order to take the quiz."

How can I do it?

2) Also, any registered user can now take the quiz unlimited times. How can I limit each user to take quiz only once?

Thanks

Sarper

_____

Hello,

1) You can specify in the description of quiz that it is accessible for registered users only.
2) For logged in users you can limit a number of attempts of passing a test by setting parameter 'Attempt Count'.

Regards,
ARI Soft
