## How I can change the language

Posted by saxolrac - 2008/09/11 16:06

---

Hi,

My problem is, i want to put quiz in spanish, but spanish is not included in the languages.

I'm translating the english file but i cant find number of things, for example: the word "choice", and the word in the email replay.

I hope someone can help me

Hello,

It seems that you translated backend language file but not frontend. For translating frontend go to the 'Languages frontend' section and add your language there. After that select this language as default.

---

I translate both, but the problem is only the word "choice", doesn't work.
