
Can I give explanations to the wright answer

Posted by Gilbert - 2008/09/15 13:40

I want to explain why an answer is correct (in the results). Is that possible? How can I do this? Thank you for your answers. Gilbert

Hello,

Current versionÂ doesn't support this ability. If it is critical we can offer custom development of this feature for you otherwise you can create topic there(<http://ari-soft.com/ARI-Quiz-Feature-Request/>) and we will inform you when itÂ is complete.

I need this feature too, as I assumed this was already in the product.

Hello,

We'll add this feature into the next version of the component, which will be available at the next week.
