## How I can send the result automatic to the users?

Posted by saxsolrac - 2008/10/07 10:01

---

When I do a quiz, Does the program send automatic a email with the result to the user?

---

When logged user is passing a quiz he will see "E-mail" button after passing. Clicking this button will send results email. This is not automatic, user should click the button to receive the email. Email templates are customizable.

Here is the links to ARI Quiz help and F.A.Q.

Please login as demoadmin/demoadmin to access the links.

Right now this can be done only by changing template. We can tell you the template name or even send you the updated template that contains only one E-mail button.

If you can send me the template to saxsolrac@gmail.com.

Thanks a lot.
