
loading very slow (compared to your demo)

Posted by Joe Dalton - 2008/10/26 00:49

Hello,

my configuration
I use Joomla 1.57
SEF turned on
localhost for the moment
template rocket theme catalyst

quiz loading in 13/19 secondes (each page)

(other pages of the site 4/6 sec)

Thanks ...

Hello,

Since you are working on localhost we cannot investigate. Which browser and which version do you use? Maybe it's worth installing browser extension that measures performance, this could help.

Regards,
ARI Soft

hi,

What a good surprise, my site is now online and loading is now correct !
but i have now other issues (data error at the end of the quiz, when printing)

May be conflicts or bad configuration of sh404sef .

Can i provide-you my password, in order to investigate ?

thanks

This issue is not related to ARI Quiz component.

Thanks very much for your amazing help !!!!!!!

great assistance !!!!!
