
Not possible to add quiz category to a question

Posted by ivanjones - 2008/11/16 23:11

Create a quiz

Add a question to the quiz by view questions->add

Question add screen opens

Complete fields, but do not select a category - leave as 'none'

Save

Create a quiz category

Edit the quistion you just created

Select the category drop down - new category is not available to add

This is correct behavior. When you create or edit a question there is a list of QUESTION categories there, not a list of QUIZ categories.

Could you please try to add new question category and indicate it in the drop-down when creating a question. This works fine on our demo.

Regards,
ARI Soft
