## Quiz results - not sending email results to user

Posted by bhoye - 2016/03/30 14:03

---

Hello everyone,

I have an installation of ARI Quiz 3.8.4 on Joomla 3.5.

It's not sending results emails to users upon completion even though I have an email template designated in all of the quizzes' results sections.

It is sending emails to the static address that I've defined in the autosend email section and that email is using the same email template I defined for user emails.

Any ideas on what I'm doing wrong?

Thanks for any help.

Hello,

Could you provide a temporary access to your J! backend by email and the quiz where the problem occurs?

Regards,  
ARI Soft
