Call to a member function update() on null ERROR

Posted by tmiller558 - 2016/04/01 06:05

Hello,

All of the features of Quiz 3.85 are working normally except one: When I try to create a question in the question bank I get this error:

Call to a member function update() on null

I was able to create one question in the question bank earlier, but now I get that message when I try to edit it.

Running 3.5 and Php7

=Tom

I turned on error messages and I get this warning:

Notice: Only variables should be assigned by reference in /home/mysite/public_html/plugins/system/ariquizreloader/ariquizreloader.php on line 28

This is that code:

$document =& JFactory::getDocument();

Removing the ampersand removes the warning message.

But removing that throws other errors, so ignore that LOL!

Hello,

We are investigating the problem with creating questions with PHP 7 and provide the fix as soon as possible.

Regards,
ARI Soft

Re:Call to a member function update() on null ERROR

Posted by tmiller558 - 2016/04/12 20:50

I've updated the extension to version 3.9.0 (3.8.6 does not appear in my downloads sections).

I am still getting this error:

Fatal error: Call to a member function update() on null in /home/site/public_html/ds9/libraries/cms/editor/editor.php on line 386

Please advise.

Thanks!

Tom

Hello,

Could you provide a temporary access to your J! backend by email and describe how to reproduce the problem so we can investigate it? Probably some question(s) are corrupted.

Regards,
ARI Soft
