---

translate both files ini point and loads it in the directory something happened and I lost the setup menus on the component. I returned the default ini files, but still with the problem in ariquiz menus. How can I solve the problem? Sending attached file containing the problem. http://www.ari-soft.com/images/fbfiles/images/ariquiz-8e3e43e33e00887b07c2bb6906495b2d.png

Hello,

Send backend language files by email.

Regards,
ARI Soft

Hello,

Our mailbox is empty. Could you re-send files?

Regards,
ARI Soft

Everything is working fine with this language files on our test server. Do you use English language on backend?

Regards,
ARI Soft

I have attached files and resending

The backend of my joomla is in Portuguese, but I have another site in joomla, using the quiz ari and does not have this problem.

Thanks,
Paulob
