Venn diagram of relationship between Quzzes/bank/.
Posted by oc010000 - 2016/04/13 21:57

_____

Has anyone made a Venn diagram of the relationship between Quizzes, Quiz Categories, Bank Categories, Question Categories and Question bank? I have read the documentation and can not get out of my own way on how the relationships work.   I have used the quiz but it may not be the right way (I have a history of left handed threading).   I can't be the first person to setup their own FCC (elements 8 and 9) sample test nor the CISSP sample questions at the end of the 8 domains from the book.

_____

Hello,

Quizzes belong to quiz categories, question categories belong to a quiz and they are used to separate questions by categories (it is possible to show results for each question category at the end of a quiz).

Bank categories are used split bank questions by topic (categories). It is possible to populate quizzes with bank questions (It is useful when the same questions are used in different quizzes).

Regards,
ARI Soft

_____

I still don't think I am getting the full picture. So I attached one. Ari 1 and Ari 2 are two different views. 1 is from the reply you just sent to this and 2 is what I kind of think it looks like from the instructions. http://www.ari-soft.com/images/fbfiles/images/Screenshot_Map1____FreeMind___MindMap_Mode.png

_____

"Question" is included to quizzes. "Bank question" is included to "Bank categories". Bank questions can be used as quiz questions.

_____

Ok, here is another attempt using Dia.
dashed lines are where a question category is included in a quiz.

This is quite granular. I am guessing that a question bank can also be included in a quiz. http://www.ari-soft.com/images/fbfiles/images/Diagram1.png

_____

In question category settings possible to configure question pool. Select bank categories and number of questions which will be selected randomly from bank categories. The selected questions will belong to question category.

_____

Can a question pool span multiple bank categories or can it only span a question bank within a bank category?

_____

For example it is possible to create "Math" question category and define on "Question pool" parameters section on question category settings page how to select questions from questions bank. For example 5 questions from "Math 1" bank category, 3 questions from "Math 2" bank category and 7 questions from "Math 3" category. In the quiz all questions from this question pool will belong to the question category.

_____

Does this closely represent the way Ari Quiz looks like? http://www.ari-soft.com/images/fbfiles/images/ariquiz_venn_test.png
