## ARI Quiz result templates

Posted by seemacrun@gmail.com - 2016/05/18 09:23

---

I have a question about ARIQuiz.

I get the styles removed from the result template when I save it. Also how can I add different translations to the same result template?

Thanks

Hello,

It is not possible to use different translations in the same template.

Could you explain in more details the problem with styles in templates?

Regards,  
ARI Soft

Thanks for your reply. The problem of styles bein removed turned out to be related to the editor (when I set the default editor to None, the styles are preserved).
