
Registered users cannot see solutions

Posted by pquagliotto - 2016/06/16 15:00

Dear sirs,

in my site, my students cannot see the solutions. after having completed the quiz they are given the possibility to try another quiz but they cannot see the report with solutions.

I looked at the Quizzes results in the Admin panel and I could see that the quizzes are not registered for those Registered users. If I try as an Admin I can see the solutions and I receive correctly the email from the system.

I use:

Joomla 3.5.1
Ari-Quiz 3.7.5

I ask you for some suggestion to solve this strange problem. In the past all the quizzes were delivered perfectly.

Waiting for your kind answer please accept my best regards,

Pierluigi Quagliotto

Hello,

Could you provide a link to a quiz where the problem occurs and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
