
Likert Scale Format Questions

Posted by jeggers - 2016/06/27 23:25

Can I use multi for likert style questions, i.e. Strongly Agree, Agree, Neither, Disagree, Strongly Disagree? Each label has a different point value, but they can only choose one option.

I would appreciate any suggestions.

Hello,

The extension doesn't support this question type. It can be implemented as a custom development.

Regards,
ARI Soft
