## Are the following manipulations possible?

Posted by LoungePound - 2016/07/07 15:42

---

Hello!

I'm thinking of purchasing your pro version and have some questions.

Tell me please, is it possible to set the fields "name" and "phone number" at the beginning or ending of the test and only if these fields are filled the test result is sent on teacher's email, otherwise the test result is just displayed to the student and there is no e-mail sent.

Is it possible to do that?

Thanks in advance.

Hello,

Could you send your order number by email.

Regards,  
ARI Soft

I haven't bought the product yet, just asking you if it is possible to do so.

Sorry, guest users can enter name/email on quiz start page. About sending email only if name is filled, the extension doesn't support this ability (it can send email for all users), but this feature can be implemented as a custom development.
