
Adding quiz from frontend

Posted by Deshpande - 2008/12/04 08:37

Hi,

Is it possible to add quiz from the frontend by the registered users? Because i would like my site users to create thier own quiz and publish it from the front end. I was going through the demo and didn't see this feature. Is it possible?

Thanks in advance.
Aditya Deshpande.

Hello,

It's not possible to create quizzes on front-end. We are thinking about adding such feature in one of future releases.

Will it be available in the next release?

No.

Next release will contain import/export features and AJAXified back-end.
