
Different points for multiple answers in on Test?

Posted by meez - 2008/12/06 12:11

Dear Arisoft team,

i purchased Arisoft quiz module. i downloaded and installed the test environment.

i haven't the possibilty to make different scores/points for multiple answers ?

is this not an option in the TEST environment ? i still wat for the official version.

thanks

gr Meez

Hello,

Component with test license has full functionality but time limited. When your payment is approved we will send you the letter and you will be able to generate full license key.

If you don't have functionality to set different scores/points for multiple answers please make sure you have the latest ARI Quiz version. The latest version can be downloaded in Member Area.

Please read notes when editing questions: "

Note : Indicate answer choices and correct sum total of answer choices. If you want to set different points for answers then indicate the necessary combination of answers and percent of points for appropriate question using " link (Value should be in range of 0..100. If value is not set then user will not get points for this answer). This value will accrue for user when he selects this answer. Empty answers will be ignored."

Regards,
ARI Soft
