Skip Category ? and remove \'choice\' numbers ?

Posted by meez - 2008/12/10 08:53
_____

Hello Arisoft team,

thanks for the great support!

1) i am wondering if i can skip the category step to bring the visitors to my quiz.

Example:

I have a main-button 'Start Quiz' >> then you see 'Common' (is the name of a category(?)) >> then you have to click a link >> the you can start the quiz!

Is there a possibility to go directly to the quiz ?

2) I can't find where i can remove the numbers before the radiobuttons. I want to display only the radiobuttons.

thanks agian.

gr meez

Hello,

1) You could set up your button or link to refer to the page
index.php?option=com_ariquiz&task=cat_quiz_list&categoryId=

This will bring user directly to list of quizzes of appropriate category

2) Currently no such functionality. You can submit a feature request for this and we will think about adding this in future.

Regards,
ARI Soft

A workaround for this is to make the Choice numbers the same colour as the background by changing the CSS (in the Template menu). Look for:

.ariAnswerChoice
{
 text-align: right;
}

and add in a text colour, eg color: white;

to give:

.ariAnswerChoice
{
 text-align: right;
      color: white;
}

The text will still be there, but it won't be seen unless you drag the mouse over it to highlight.

_____

Probably nicer choice is:

.ariAnswerChoice LABEL
{
   display: none;
}

_____

I can't find .ariAnswerChoice LABEL, just these two:

.ariAnswerChoice
{
 text-align: right;
}

.ariAnswerChoice *
{
 vertical-align: middle;
}

Do I just change the first one to say display: none;?

Thanks.

Alan

_____

Hello,

You can just add this style .ariAnswerChoice LABEL.
