
Question numbers? Question 1 Question 2 etc ?

Posted by meez - 2008/12/11 12:32

Hello,

is it possible to have:

Question 1

Question 2

Question 3

so you get automaticly numbers behind the 'Question' text, depending how much questions you have ?

thanks

gr meez

Hello,

Could you please explain in detail. It's possible to display similar thing before the ANSWERS not the questions.

Regards,
ARI Soft

How do you display it before the 'Answer'? just put 1. and 2. etc before the text of the answer?

or can you generate it automaticly by the back-end?

Numbers are generated automatically.

Please have a look at our demo. There for single and multiple questions you will see Choice 1, Choice 2, Choice 3, etc. for answers. "Choice" text can be easily trnaslated to any other text.

So it's not possible to have it after the word 'Question' (generated in Components >> Ari Quizz >> Languages Frontend) ??

If you change word 'Choice' to 'Question' there is no problem to display Question 1, Question 2, Question 3. You can try on our demo.

no but i already removed the labels choice 1, choice 2 ect by css. for me it's not neccisary to have text in front of the radiobuttons. i want something like this:

Question 1: "Here the text of the Question"

"Here the text of the answer"

"Here the text of the answer"

"Here the text of the answer"

"Here the text of the answer"

after you get Question 2 etc etc

For questions currently is displayed:

Question 1 of 9

Question 2 of 9

...

If you would like to display also Question 1, Question 2, etc. there are two options:

1) You can change template manually. In this case we won't be responsible if anything goes wrong and you cannot count on our help.

2) We can implement this for you as custom development. This will probably cost 1 work unit. If you are interested please contact us by email.

thanks for the replys.

to change this myself, which php file(s) do i have to go into?

Here is the file you asking for:

/components/com_arquiz/view/question.html.php

Again, please note: in case of changing any code we won't be responsible if anything goes wrong and you cannot count on our help.
