Bug Posted by transqual - 2008/07/21 04:03
Hi Folks
I found a bit of a bug. I am entering a series of questions into the Question bank (com_ariquiz / bank), and have gone over 30. However whenever I try to extend the limit of what's shown or go to the next page, I find myself within the com_ariquiz / question_list instead. This is a little annoying if I need to edit a question that's further down the list. Can this be fixed please.
