
Thinking of buying, About Quiz Results

Posted by phal - 2009/01/06 08:52

I have about 2000 members on a medical community website. Can Ari Quiz be used as an online test where the admin can review the results of logged in users who took the quiz, and export the list of results according to users and scores.

Hello,

Thanks for your interest.

Yes, ARI Quiz can be used for this. Please have a look at our back-end functionality for quiz results (please login as demoadmin/demoadmin first). There is possibility to export to CSV, HTML, Excel, Word. If you need anything else we can talk about custom development.

Regards,
ARI Soft
