_____

Hello,

1. "how i can put image for my answers?"
You can put image to the answer if you will write appropriate piece of HTML code in answer.

2. "how i can make relation for every question with befor answer?"
There is no such functionality.

3. "how i can set value for every answer of a question?"
We plan such functionality for one of the future releases.

Just for your information,
We are finishing testing of ARI Quiz 2.0 now. This new and significant release will make the component work in Joomla 1.5 native mode and bring new features.

_____

Hello
thanks for your reply,

'You can put image to the answer if you will write appropriate piece of HTML code in answer'

plz guide me about how to insert html/tag into answers fields.
can I insert html tag directly in answers fields?

_____

You can insert smth like in the answer's field:

 where img_path is the path to your image. This is standard HTML image tag, you can find more information about using it over the Internet.

Regards,
ARI Soft
