## Fancier menu for quiz selection

Posted by Forex\_Master - 2009/01/18 23:30

---

The current quiz menu (the first page that opens when a user clicks on the Quizz menu TAB does the job well.

I personally find it a bit crude when it comes to have it in line with aesthetically nice website (not saying mine is wonderful).

I was wondering, do we have somewhere at our disposal preset templates that I can just load in to change the general aesthetic style of Ari Quiz ?

Otherwise, is it possible to done done through css styling ? how ?

Many thx and regards,

Forex\_Master

Right now you can add/edit CSS styles in your template to apply styling to this page or you can change template file /components/com\_ariquiz/view/quiz\_list.html.php.

New feature to create/edit CSS files to be applied on UI will be added in future.

Regards,  
ARI Soft
