## Quiz Results Question

Posted by cimidr - 2008/07/26 11:21

---

Hi all -

Is there a way to show a different result based on the score?

For example:

0 - 10 correct answers means your knowledge is below average

10 - 20 correct answers means your knowledge is average

20 - 30 correct answers means your knowledge is advanced

Thanks!:)

Hello,

There is no exactly such functionality now. You can try to change the result text template for something similar or order custom development. If you are interested please write us a letter.

Regards,  
ARI Soft

This is a good idea. Developers should consider it.

We will think about this.

Thanks!
