
Display a question based on a answer

Posted by martin - 2009/01/19 16:46

Hello,

I am interested by your product but I have questions :

Is that allows ARI QUIZ display a question based on the answer to the question before?
And have you a French translation ? :)

Best regards

=====

Hello,

Thanks for your interest.

No, right now ARI Quiz does not allow to display a question based on the answer to the question before.

There is no French translation, but you can easy translate resource strings to any language using handy back-end functionality.

Regards,
ARI Soft

Thank you for your response.

Do you plan to rapidly develop this feature ?
Otherwise, is it possible to modify your code (Of course with a liscence) ?

- 1) Can you describe your feature more details?
- 2) ARI Quiz source code is encoded, but you can order custom development or submit feature request.

Regards,
ARI Soft
