
More than one correct answer?

Posted by wagner - 2009/01/21 13:44

Is it possible to have more than the one correct answer in the single question types?

If not is it be possible to amend the Quiz statistics page to tick all the questions I weighted as 100% as correct?

Now, you can type 100% in '% Score' field for appropriate answer on page for setup single question, but on quiz statistics page this answer don't mark with green tick. If you need this you can submit feature request or order custom development.
