
paginator on home page

Posted by mohanned2012 - 2013/05/05 09:32

hi ...

i ve paginator on my home page which preview some articles have links inside them when i click the links the result article displayed on the same page -the homepage below the content - not on new page ...any help appreciated

Hello,

Use target="_blank" attribute for tags if you want to load a link into a new browser window.

that is not the problem because the attributte of the link tag is already blank and the link opens in a new page ...but reload all the content of the original home page then its appears below it

this is the paginator on my home page
on file paginator1
and when i click the link inside the paginator the content opens inside the home page as you see in paginator2 ..i am sorry my website is on local server so i can't give you a link ...i hope you can help me ..thank you <http://www.ari-soft.com/images/fbfiles/images/paginator1.JPG>

We can't investigate the problem by screenshots.

If you click by links inside articles, are they load correctly?
