## Images/other questions

Posted by Nixie - 2011/05/01 21:03

---

Hi.

We may want to use this extension, but need to know about some features before we can decide.

1. We need it to feed from multiple Section/Categories automatically (no problem - included).
2. Articles in the Sect/Cat to feed do not have/display images, but we want images in the slideshow. Is this possible? How could this be done?
3. In the demo, there is a text link to the articles. Is it possible to instead make the whole image clickable to an article? How about to a lightbox, displaying same or different article content (inside the lightbox)?

Sorry, but I couldn't find these in the site description of ARI Easy Slider or in the forum and these are very specific needs that are being requested of us. Seems everything we find can meet one or two of their needs, but nothing that has all of them.....

Thanks.

-Nikkole

Hello,

Thank you for your interest in our extension. Regarding your questions:

1. Yes, it is possible to define categories and/or sections and the extension will select article from selected categories/sections.
2. The extension can show articles intro and full text, if they doesn't contain images the extension will not show images.
3. The module provides ability to enter custom HTML code for read more link. Images can be used as "read more" link without problem.

Regards,

ARI Soft
