Hello,

I installed everything up but I have no item is displayed. Is there a tutorial on the module? The information on the site are not sufficient.

Thank you

Hello,

Documentation can be found in "Description" field on module settings page:

If something doesn't work, could you provide link to page where we can see the problem and screenshot of module settings page? BTW, if you use Joomla! 1.6, check that "System - ARI Extensions" plugin is installed and enabled.

Regards,
ARI Soft
