## Part of articles images not showing

Posted by cadratin - 2011/06/14 15:33

---

Hello,  
I'm facing this problem:  
having multiple articles and want to show only intro part which is composed of an image. The first 19 articles are showing correctly and in the last 7 seven I get the rotating wheel instead of the image. Any clue on what is going on? The code is similar on all article, settings also.  
Using Joomla 1.5.23

Hello,  
  
Could you provide link to page where we can see the problem?

Regards,  
ARI Soft

uh oh... seem to be a browser specific bug: occur only with Firefox, sorry for not having checked this before...

In FireFox 3 the module works fine. Loading icons are shown in FireFox 4. It seems this feature of your site template, it shows loading icons instead of images while images are loaded.

The problem appears with Firefox 3.6 on Windows Vista and Mac OSX 10.6 and also with Firefox 4.01 Mac...  
I saw a similar post on the forum which wasn't flagged as resolved.

Sorry, but this is not a problem with "ARI Easy Slider". This is feature of your site template. If you want to remove loading icons, remove or comment the next code from site template:

```
window.addEvent('domready', function() {new GantrySmartLoad({'offset': {'x': 200, 'y': 200}, 'placeholder':  
'/2011/templates/rt_modulus_j15/images/blank.gif', 'exclusion': }); });
```

Hello,  
thank you for the feedback. Effectively: an option into the gantry template admin was at the origin of the problem.  
Still don't know why it occurred for only some images, but deactivating it resolved the problem.  
Again, thank you for your support  
Best  
Didier
