
Show catagory title?

Posted by Shake - 2011/06/17 08:57

Hi there,

Thanks for your help past week!

The result: <http://www.no12.nl/ggl/>

Only one question:

Is it possible to show the Catagory Title, just like the way you show the Readmore link.....

Thanks in advance!

Regards,

Jack

Hello,

Download and upgrade the module. New version supports new predefined variable {`$category_title`}
