
ARI Easy Slider - the display panel not aligned...

Posted by Ezhini - 2011/07/15 18:22

I installed the ARI Easy slider.
Works.

However, the images shown inside the display panel is misaligned: A bit of the previous slide is showing at the left edge and the current slide cuts off at the right edge!

See this screen shot showing the mislignment.

Any ideas why? Am I doing something incorrect?

Hello,

Could you provide link to page where we can see the problem?

Regards,
ARI Soft

What browser do you use? We have checked it in IE 8-9, FireFox 3.6.18, Google Chrome and the slider looks fine:
