## Easyslider not \"saving\" article choses Jomla 1.5

Posted by marquard - 2012/01/09 20:55

---

Hi, I have just installed this on Jomla 1.5, and I'm not able to chose what articles Easyslide should show, I just shows alle my articles, and I'm not able to chose (mark) what sections to show. I have read that when using 1.6 I need to install som Ari system extension, but I'm using 1.5 and I'm not allowed to install this extension (I get an error). What can I do to get this working on Joomla 1.5 (to be able to chose and remenber in the article section of the setup)?

Regards Kim

Hello,

Could you provide temporary access to your J! backend by email so we can investigate an issue?

Described problem occurred in IE 9 and it was fixed in the latest version of the extension.
