
Can't save settings in new 1.310 / J2.51

Posted by 6degrees - 2012/02/10 14:13

I upgraded to version 1.310 on our J2.51 version

I can't seem to save changes done in the module settings ? More specifcally, in the category assignation and template values ?

Any idea what's happening ?

Danny

Hello,

Check that "System - ARI Extensions" plugin is installed and enabled.

Regards,
ARI Soft

It was installed. I uninstalled and reinstalled it now and am still getting this problem.

This seems to be a conflict with the NoNumber Advanced Module Manager I installed.

By uninstalling it, your module saves correctly.

Any idea if this is an ARI problem or a NoNumber problem ?

Thanks,
Danny

We have sent new version of "ARI Extensions" plugin by email. It should work fine with "Advanced Module Manager" extension.

Regards,
ARI Soft

Wow !
Spectacular support !
The module now saves when the other plugin is activated!

THANKS!
Danny
