## Nothing showing

Slide content is not showing for me.  
The system plugin is active.

Under Articles, I selected my category and specified the article numbers.  
I put {\$fulltext} in the template tag.

I just get a blank area, nothing shows up except a bullet?

Obviously something is going wrong, but I'm not sure what to even check.

I just want to fade the full text of articles.

Thanks.

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate an issue?

Hello,

Could you provide a link to a page where we can see a problem and a temporary access to your J! backend by email so we can investigate an issue?

Regards,  
ARI Soft
