
How do I make Slider and Sexy Lightbox...

Posted by Internaut - 2012/04/17 19:19

I have the slider set up. The intent was to have all "More..." open in a lightbox. As it is, when lightbox opens, it only shows the image - no text.

Unable to get a "More" to show up in the slider, and unable to have a image link to open lightbox.

Any help is appreciated.

Hello,

Could you provide a link to a page where we can see a slider, specify what image do you want to use a link and send screenshot(s) of the module settings page and "System - ARI Sexy Links" by email?

PS: If you provide a temporary access to your J! backend we will be glad to help configure the extensions.

Regards,
ARI Soft
