## Part of URLs are cut off.

Posted by Internaut - 2012/05/11 22:28

Hi and Tnx,

We are not sure why, but recently, if we use the "Read More" via edit Article, and view Ari Easy Slider slide results, each of the slides have an added incomplete URL as follows:

/joom17b5/index.php/13-latest-events/106-seasonal-service There is nothing else before the "/joom17b5..." (Joom's folder)

The link does not work. It was a Read More and via sexy links, opened in a lightbox. Two of us have tried all kinds of editing of the template, article, categories, looked @ but didn't touch Sexy Links plugin (Ari set it up for us).

NOTE: Other links on the site work just fine. It is only in the slider that the links show up as partial links.

Ideas on what to look for?

Hello,

Where we can see the problem?

Regards,  
ARI Soft
