
how can I add a parameter to read more.

Posted by bowltour - 2014/05/10 11:50

how can I add a parameter to read more. What razdelelitel between different parameters. tell me the exact syntax between two or more parameters. For example {\$ introtext}????????????? {\$ Readmore_link}

Hello,

You can use HTML code in "Template" parameter. Don't enter unnecessary space between { and \$ symbols. For example use the following code:

{\$introtext}

Read more...
