
Slider will not slide!

Posted by teejaygirl818 - 2010/08/02 15:17

I installed this module and plugin, however it will not scroll. I have changed the settings and perhaps it is a jQuery issue. Also, the css is not working quite right either, but I am not trying to troubleshoot that yet.

What should I try to adjust? To see it, please go to:
[Web Site here](#)

Thank you for your advice.

Hello,

It seems this problem with a 3rd party plugin for optimization javascript and CSS files including. Could you provide temporary access to your Joomla! backend by email that we can investigate this issue and provide solution? Or say what plugin you use that we can reproduce this issue on our test server.

Regards,
ARI Soft

Hi,

I think, I have the same problem.

Webstite

Thank you for your advice.

Hello,

Could you provide temporary access to your Joomla! backend by email that we can investigate this problem? It seems this is a conflict with another extension which is used jQuery javascript library.

This was a good tip!!! When I activate jquery... the slider slides... :blush:

Thank you!

Best regards,

Thomas

PS: I deactivate the ari-soft-account now.

PPS: Sorry for my bad english.
