
Slider Not Working

Posted by holdsworthdesign - 2010/08/13 22:23

Hi, I just installed the Easy Slider here and it doesn't seem to work at all. Any advice?

Thanks!

Hello,

It seems you have configured the module that it loads only one article. The module should contain more than one item that it can slide them.

Actually, I currently have two articles selected by ID. Before that, I tried selecting entire sections and categories and nothing would show up.

Could you provide temporary access to your Joomla! backend by email that we can investigate this issue?

Thanks for your help, but the client has decided they want a different type of slideshow to fill this space anyways. Maybe I'll come back for help the next time I can use this module!
