
Small images not showing

Posted by teejaygirl818 - 2010/10/10 03:08

Hi Admin:

My slider has been working well except for one thing; It loads images on the first four articles, but on the fifth article, the circle loader continues to go around. I can't figure out why... Any advice?

Thanks,
teejaygirl

Website is here.

I really like this slider and do not want to change it out for this one thing...

Hello,

Could you specify what browser you use? We have tried to reproduce the issue for 'Our Reviewers Say...' module on your site, but we couldn't to do it. Could you also provide screenshot where we can see the problem?

Regards,
ARI Soft

Right now the graphics are removed... do you want me to add them back?

Could you return image back that we can see this issue? It helps us find the reason of the problem.

Regards,
ARI Soft
