Conditionally Display and Image

Posted by ecrespy - 2016/03/03 14:37

_____

First, I would like to say that I very much like the product.

I have a question. How can I conditionally display an image in a table depending on the value retrieved from the table.

So suppose I pull 3 columns in my select from the table

ID, DESCRIPTION, TYPE

IF the Type = 1, then display some hardcoded image 1
If the Type = 2,   then display some hardcoded image 2

Is this possible?

_____

Hello,

If data is shown from a database, it is possible to use CASE expression in SQL query.

Regards,
ARI Soft
