use of ARI data tables

Posted by Leif_e - 2016/03/06 11:22

_____

Hi

I have a question regardding ARI data tables

I have a memberlist in a seperate datatable in joomla with aprox. 1000 records

Can I create a table with a filter with fx name and adress and then only the members who has paided there anual fee ?

Is it possible to export fx to an excel file or simular ?

Best regards
Leif

_____

Hello,

It is possible to use request variables in "WHERE" clause of SQL query. For example a HTML search form can be placed in one article and the module in another article and send data from the form to the module.

Regards,
ARI Soft
