## Change data

Posted by Leif\_e - 2016/03/08 14:56

---

Hi

Is it possible to use ARI data table for read a post in the database, and then erase or change the record?

If No, do ARI data have module I can use for that

=====

Hello,

The extension doesn't modify data. As possible solution you can create a stored procedure in the database which will modify and returns the necessary data and call this stored procedure in the module, but it requires knowledge of SQL.

Regards,  
ARI Soft
