## Change columns position

Posted by adolcini - 2016/04/09 16:50

---

Hi ARI Soft

Hi I'm using ari tables with a CSV file as source, there is something strange about the order of the columns, I set this order in the back office :

<http://prntscr.com/aq597c>

as you can see "Metodo" is position 5 and "Codice ASL" is #6  
but in the front end "Codice ASL" is before than "Metodo"

<http://prntscr.com/aq5a5f>

Is it possible to change the order of the columns in the front end independently from the order of the columns in CSV file ?

Thanks

Andrea

Hello,

The extension uses columns ordering like in CSV file. Currently it doesn't support ability to change order.

Regards,  
ARI Soft
