
Dta Tables

Posted by zanni - 2016/04/11 17:04

Hello,

I have Ari Table installed on my site. I've been able to view the table in any browser. Until recently, I am unable to see the table page in Safari. I have upgraded both Joomla and Ari Tables to the latest versions. However, I still can not see the table page, there is just the progressing notification endlessly. I can, however, see the data tables in Chrome and Firefox, just not Safari.

I've attached a screenshot. Any ideas?

Hello,

Send a link to a page where the problem occurs so we can investigate it.

Regards,
ARI Soft

Hi,

You would have to log in from the front-end as Username: *** / Password: ***. I just logged in and a portion of the page is displayed, not both tables.

The link is: http://www.womenabout.org/cms/wab2.5/index.php?option=com_content&view=article&id=77&Itemid=1099

Thanks for the help.

It is not possible to login with the provided credentials. The following error occurs:

"Username and password do not match or you do not have an account yet."

Regards,
ARI Soft

We can't reproduce the problem. The tables are shown fine in Safari:
