Problem in Back End

Posted by jdiamond - 2016/04/17 19:58

I am an ARI Data Tables pro user, and have recently noticed that there is a problem in the back-end display when editing ARI Data Tables module.

Specifically, many of the drop-down fields are not shown correctly as drop-downs (see the attached screenshot).
http://www.ari-soft.com/images/fbfiles/images/Screen_Shot_2016_04_17_at_3.png

I have tracked down the issue, and it seems to be caused by the combination of a dependency on mootools, and the fact that mootools is loaded later, after cloner.js (instead of before).

Here is a patch that I applied to fix the issue in my installation:

```
--- elementscloner.php.ORIG 2016-04-17 15:35:42.099283526 -0400
+++ elementscloner.php 2016-04-17 15:20:48.416987617 -0400
@@ -117,14 +117,15 @@
   $uri = $this->_getRootAssetsUri();

   $document =& JFactory::getDocument();

   if (J3_0)
   {
    JHtml::_('jquery.framework');
+   JHtml::_('behavior.framework', true);
   }
   else
   {
    $document->addScript('//ajax.googleapis.com/ajax/libs/jquery/1.4.4/jquery.min.js');
    $document->addScript($uri . 'jquery.noconflict.js');
   }
```

I hope that this is helpful to others who may be encountering this issue!

Hello,

Check that you use the latest version of the extension (1.15.6). It is available in "Member Area".

Regards,
ARI Soft
