Columns settings and german umlaut

Posted by gdsd - 2016/05/03 13:08

_____

Hi!

I am using an "ARI Data Table" with a csv-file in ISO-8859-1 file encoding.

Now I'd like to - for example - center one column.

This works fine with "column settings". However, I noticed, when the ID (= title of the column) includes non-english characters, like "Ã¤, Ã¶, Ã¼, ÃŸ", the column settings do not work.

Is there a way to make this happen?

Thanks!

_____

Hello,

It is possible to use a column index in "Columns settings -> ID" parameter. Use 0 value for the first column, 1 for the second column and etc.

Regards,
ARI Soft
